# Intelligent Transportation Society of Alaska

## About ITS Alaska

The Intelligent Transportation Society of Alaska (ITS Alaska) is a non-profit corporation established in January 2008 as a chartered state chapter of the national organization, Intelligent Transportation Society of America (ITS America). ITS America is the leading advocate for technologies that improve the safety, security and efficiency of the nation's surface transportation system. These technologies are referred to as Intelligent Transportation Systems or ITS. ITS refers to the rapidly emerging transportation products, services and systems which are based on advanced technologies such as computers, communications and electronics; and which are called "intelligent" because their essential functions are based on attributes normally associated with intelligence - sensory capabilities, memory, communications, information processing and adaptive behavior.

## Our Mission

ITS Alaska's mission is to elevate safety and mobility through leadership and promote a strong innovative intelligent transportation system community in Alaska.

ITS Alaska has the potential to be a strong advocate for intelligent transportation systems and foster an environment for members to share ideas, encourage interest and integration, stimulate public-private and institutional partnerships, and support ITS developers, implementers and policy makers.

Milepost 110, Seward Highway—  
Jack Stickel, ADOT&PF

## Membership

ITS Alaska welcomes those interested in advancing intelligent transportation system deployment in Alaska, especially those in the transportation industry. Members representing colleges and universities, government agencies, organizations, associations, corporations, and individuals are all invited to join. Be a part of this fast growing industry.
